Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: The method and apparatus for measuring tilt of an optical disc having a data beam and a tilt beam having:

- I.) different wavelengths, the same focal point location and the same polarization condition (Page 7, lines 11-13 of the Specification);
- II.) different wavelengths, the same focal point location and different polarization conditions (Page 7, lines 19-23 of the Specification);
- III.) the same wavelength, different focal point locations and the same polarization condition (Page 7, lines 14-18 of the Specification);
- IV.) the same wavelength, different focal point locations and different polarization conditions (Page 7, lines 19-23 of the Specification);
- V.) the same wavelength, the same focal point location and different polarization conditions (Page 7, lines 19-23 of the Specification);
- VI.) different wavelengths, different focal point locations and the same polarization condition (Page 7, lines 24-26 of the Specification); and
- VII.) different wavelengths, different focal point locations and different polarization conditions (Page 7, lines 19-23 of the Specification).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify

Art Unit: 2627

the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- I.) 1-3, 7-14 and 18-20;
- II.) 1-3, 7-14 and 18-20;
- III.) 1, 4, 5, 7-12, 15, 16 and 18-20;
- IV.) 1, 4, 5, 7-12, 15, 16 and 18-20;
- V.) 1, 7-12 and 18-20;
- VI.) 1, 2, 4, 6-13, 15 and 18-20;
- VII.) 1, 2, 4, 6-13, 15 and 18-20.

The following claim(s) are generic: 1, 7-12 and 18-20.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species lack the same or corresponding special technical feature because the data beam and tilt beam of each species has a different combination of the same or different wavelengths, the same or different focal point locations, and the same or different polarization conditions (see Page 7, lines 11-26 of the Specification).

4. A telephone call was made to Michael E. Belk on November 26, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Battaglia whose telephone number is (571) 272-7568. The examiner can normally be reached on M-F, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, A. Wellington can be reached on (571) 272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
